The rain, Friday, improved the surface of the racing course, and riding mounds carried all together too dry for distance. The four pairs in the horses' sweepstakes open to the state dragged a heavy lot over the lot with A. M. Daniels' pair, and the three best over F. M. Everett of South Paris. The steers of C. D. The Quaker Oil Stove is an entirely new type of heater. It makes oil heat, with all its advantages, available to homes without heating plants.

This stove eliminates dirt and labor from heating. It eliminates shovelling and carrying in coal, splitting wood, carrying out ashes, tending the stove. It enables you to start a fire in the morning or any time you need it by merely turning on the oil and dropping a lighted match or a piece of burning newspaper into the stove. It enables you to keep a low fire for mild days, a hot fire for cold days. The only attention the Quaker Oil Stove requires is that you keep it supplied with fuel. If a standard 4 gallon tank is used, this means filling it with oil less than once a day. If The Quaker Oil Stove can be installed anywhere a coal stove can be used. It is as easy to set up as a coal stove. It requires no special knowledge to operate it. Once installed, it will deliver unflinching heat just as you want it. And it is entirely noiseless.

The Quaker Oil Stove is extremely economical in operation, does not require the use of kerosene, but burns cheap 34-36 gravity oil—furnace oil of the type commonly used by oil burners and available everywhere.

The price of the Quaker Oil Stove is ridiculously low. Despite the fact that it adds the greatest comfort to your home, the price is one everyone can afford.

Arrange to see it today "at the corner hardware store."

# Finds Relief From Torturing Ailments

After Suffering for Months From Indigestion, Sleeplessness and Run-Down Condition, Advertising Man Regains Health and Strength Quickly. Takes Tanlac

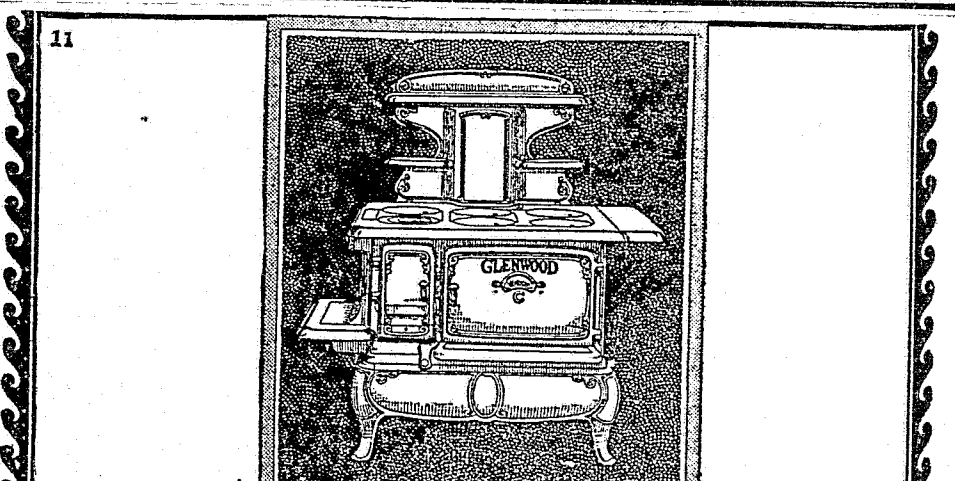

W. L. Champagne, 241 Pleasant Street, Worcester, Mass., a well-known man who is highly regarded in business circles, says: "Imagine not being able to eat without being miserable for hours afterward. Not only was I bloated with gas, but I suffered from biliousness due to a torpid liver. My nerves were affected, also, and I lay awake night after night rolling and tossing. I got up in the morning exhausted and without appetite, knowing that food would disagree with me. "I tried Tanlac. And the results amazed me. I began to sleep better, eat with relish and without suffering indigestion pains. I gained weight. "Tanlac made me a new man. I now enjoy robust health, sleep like a child, and work all day at high speed without tiring. But I have not stopped taking Tanlac for it is the one remedy for continued good health, for keeping strong. Everyone should take this wonderful tonic."

Tanlac has helped thousands of New England men and women. It is

NEW WOOL VS. OLD WOOL

100 PERCENT VIRGIN WOOL

AND WHY!

Which would you prefer, woolen fabrics made  
from old cloth, or fabrics made from pure woolen  
strands fresh from the sheep's backs?

Both articles look very much alike, but there's  
a world of difference in their appearance and quality  
after a few weeks wear. Reclaimed wools cannot  
compete with fabrics made of fresh new wool, be-  
cause new wool has life, strength and beauty that  
only the original can give. You get 100 percent vir-  
gin wool fabrics in KIRSCHBAUM SUITS and  
nothing else.

Lesson for October 3

## ISRAEL JOURNEYING TOWARD CANAAN

LESSON TEXT—Numbers 10:11-36.

GOLDEN TEXT—"Come thou with us and we will do thee good."

PRIMARY TOPIC—A Journey of Love.

JUNIOR TOPIC—Journeying in the Wilderness.

INTERMEDIATE AND SENIOR TOPIC—What Israel Learned in the Wilderness.

TYPING PEOPLE AND ADULT TOPIC—How God Guides His People.

Israel remained almost one year at Sinai. It was a veritable schooling for them. Their stay was necessary.

1. To allow them to recuperate from the effects of many years of slavery.

2. To train them morally and spiritually for the great work before them.

The wonderful transactions at Sinai served to inspire them with courage and hope, for through them they came to know God as their king and themselves as His covenant people.

3. To have them thoroughly organized.

This was not only necessary for the march, but for the warfare in gaining possession of the land of Canaan.

1. Marching From Sinai at the Hand of Moses (vv. 11-29).

The nation had now grown to a great host—the army itself of 603,550 souls. Allowing three persons to every soldier, there would be 1,810,650. The army was organized into four great sections or divisions with three tribes to each division. The Levites were organized on the basis of the tribes of Aaron—Gershon, Kohath and Merari. The Kohathites had the place of honor about the tabernacle—place of the most precious things. The Kohathites had the next place of honor while the Gershonites fell upon the Kohathites.

2. The signal given (v. 11).

The signal of the cloud from off the sanctuary was the signal for the camp to be broken and the march to begin.

3. The signal given to rest (v. 12).

The signal to march must be a definite one, so the sign to rest must be definite.

4. The Commander (v. 13).

Moses was the Commander through his servant, Moses.

5. The order of the march (vv. 14-18).

As they marched the division led by Reuben went forward, followed by Simeon and Judah bearing the corner of the tabernacle. Then marched Reuben's division, followed by the Kohathites bearing the sacred vessels of the tabernacle. These were followed by the division of Ephraim and Dan. The tribe occupied a central position with the moving caravan.

6. Moses Seeking the Help of Hobab (vv. 29-32).

Hobab was a shrewd child of the desert. Moses thought therefore that his knowledge thereof would be helpful. The children of Israel were going forth under the guiding care of the Almighty. Surely He could be trusted. Certainly He knew that dreadful wilderness.

7. "We will do thee good."

Moses had faith in God's promises to Israel and could well assure Hobab that good would come to him by identifying himself with God's covenant people.

8. "Thou mayest be to us instead of God."

Moses still insisted that Hobab should go along, not only for the good he could get but for the good he might do.

9. Marching to Canaan With the Lord as Leader (vv. 33-36).

Even though Hobab did go with Israel, we never hear of his leading the people. The Lord will not have it so. Observe:

1. "The ark of the covenant of the Lord went before them" (v. 33).

The ark, the symbol of the divine presence, moved out of its place in the midst of the camp and took its place at the head.

2. The cloud of the Lord rested upon them (v. 34).

This was an indication that God was not only leading, but governing His people and protecting them.

3. The Lord's vindication (vv. 35, 36).

Moses' unbelief caused a reproach unto the Lord. This action on the part of God vindicated His leadership. Moses gave recognition to this act of God in identifying himself with His people. When the ark rested and set forward, he exclaimed, "Rise up, Lord, and let thine enemies be scattered and let them that hate Thee flee before Thee," and when it rested—"Return, O Lord, unto the many thousands of Israel."

God's Love

We are taught to think that God's love is the biggest thing in the universe. Let us think of some of the biggest things we know, and then we will lift our eyes upon one that is bigger than all.—J. H. Jovett:

Happiness Counts Most

The will of God respecting us is that we shall live in each other's happiness and life, not by each other's misery. . . . men help each other by their joy, not by their sorrow.

How Glasses Preserve One's Youthful Appearance

It is often urged that glasses will make the wearer look old, but, as a matter of fact, wearing glasses is one of the best preservers of a youthful appearance.

This is because prolonged eyestrain causes wrinkles and "crow's feet" to appear prematurely and give the countenance a strained, tired, drawn, cross look, which is far more to be avoided from a point of view of appearance, than from any real or fancied disfigurement caused by glasses.

We use particular care in fitting glasses and in the selection of mountings most becoming to each person's individual style of beauty.
